

2025 Undergraduate Admissions Regulations of Hunan Institute of Engineering

Chapter I General rules

Article 1 The constitution is formulated in accordance with the *Education Law of the People's Republic of China*, the *Higher Education Law of the People's Republic of China* and other laws and regulations as well as the relevant provisions of the Ministry of Education, and in light of the actual enrollment work of the university.

Article 2 The full Chinese name of the University is Hunan Gongcheng Xueyuan; English name: Hunan Institute of Engineering;

Address: No. 88, Fuxing Middle Road, Yuetang District, Xiangtan City, Hunan Province;

There is Shuyuan Road campus, which is located at No. 17 Shuyuan Road, Yuetang District, Xiangtan City.

Department in charge: Hunan Provincial Department of Education

Education level: Undergraduate

National standard code of institution: 11342 Type of school: Public

Article 3 The name of the school that issues the academic certificate: Hunan Institute of Engineering. Type of certificate: full-time undergraduate certificate of general higher education; Those who meet the conditions for granting a bachelor's degree shall be awarded the corresponding bachelor's degree.

Article 4 The University shall follow the principles of “fair competition, fair selection, openness and transparency” in its enrollment work, resolutely implement the enrollment policies and disciplinary requirements, and strictly implement the “sunshine project” of enrollment by examination.

Article 5 The University is located near the river and lake. The campus covers an area of 1830.6 mu with a construction area of 576,000 square meters. It is “garden-style unit” and “civilization model campus” in Hunan Province. 73 years of deep engineering education, 24 years of

applied undergraduate education unremitting efforts, 15 years of “excellence plan” in-depth implementation, 13 years of effective exploration of professional degree graduate education, always based in Hunan, facing the country, serving the grassroots, for the mechanical and electrical industry, textile industry and social and economic construction of more than 200,000 high-quality applied talents.

Article 6 School enrollment categories: general class, art class, Chuyi Craftsman Programme, etc. The final enrollment category shall be subject to the documents issued by the superior department in charge.

Chapter II Organization and Management

Article 7 The University establishes the Leading Group for enrollment work of Hunan Institute of Engineering, which is responsible for studying and deciding the enrollment scale of the university, formulating policies and other important matters. The Enrollment, Employment, Innovation and Entrepreneurship Guidance Office of the University is responsible for the daily work of enrollment organization and implementation.

Article 8 During the enrollment period, the discipline inspection and supervision department of the university shall supervise and inspect the enrollment and admission in the whole process to ensure that it is orderly, fair and just.

Article 9 The University strictly implements the policies, regulations and discipline requirements of the Ministry of Education and the Provincial Department of Education in the enrollment work. The university does not cooperate with any social organizations or personnel, and does not entrust social organizations to enroll students. Where there are social organizations and individuals who have cooperation with our school and can ensure the admission of candidates through “internal indicators”, candidates can immediately report to the competent education department, and those who have suffered relevant losses can report to the public security organs.

Article 10 Our University will strictly implement the admission policy and admission discipline. For the candidates and staff who violate the admission rules, they will be dealt with in accordance with the Measures

for Violation of the National Education Examination (ordered by the Ministry of Education No. 33) and Interim Measures for Handling Violations of Enrollment of Ordinary Institutions of Higher Learning (No. 36 of the Ministry of Education) will be dealt with in accordance with the procedures and regulations. Candidates, parents and the community are welcome to supervise the enrollment work of our university.

Chapter III Enrollment Plan

Article 11 The University will enroll students from 29 provinces (autonomous regions and municipalities directly under the Central Government) in 2024. In accordance with the requirements of the Ministry of Education for the preparation of enrollment plans by province and specialty, and in light of the university's development plan, school-running conditions, disciplinary development, student resources and social needs, the University will formulate a nationwide enrollment plan for 2024. The specific enrollment plan by province and by specialty shall be subject to the enrollment plan promulgated by the competent enrollment department of each province (autonomous region and municipality directly under the Central Government). The school reservation plan shall not exceed 1% of the total enrollment plan, which is mainly used to adjust the imbalance of online students. The reservation plan shall implement the unified admission regulations of the school.

Chapter IV Enrollment Major and Admission Requirements

Article 12 The University will enroll 544 majors in 2024, which are specific in the provinces (autonomous regions and municipalities directly under the Central Government) and related categories. After the provincial and specialized plans of the University are determined, the enrollment plans promulgated by the provincial (autonomous regions and municipalities directly under the Central Government) enrollment examination institutions shall be subject to the standards

2025 List of Majors Available for Admission at Hunan Institute of Engineering

School and department	Major	Duration	Tuition Fee (RMB/Academic Year)	Subject Requirements for Provinces with College Entrance Exam Reform	Subject Requirements for Non-Reformed Provinces	Notes
School of Electrical and Information Engineering	Electrical Engineering and Automatization	4 years	5900	Physics, Chemistry (Both subjects must be selected by candidates for application)	Science	
	Automation	4 years	5900			
	Electronic Information Engineering	4 years	5900			
	Measurement And Control Technology and Instrumentation	4 years	5900			
	New Energy Science and Engineering	4 years	5900			
School of Mechanical Engineering	Mechanical Design, Manufacture and Automation	4 years	5900			
	Material Shaping and Control Engineering	4 years	5900			
	Mechatronic Engineering	4 years	5900			

	Industrial Engineering	4 years	5900	Physics (1 subject must be selected by candidates)		
School of Textile and Garment	Textile Engineering	4 years	5900	Physics, Chemistry (Both subjects must be selected by candidates for application)		
	Clothing Design and Engineering	4 years	5900	No specific subject requirement	Co-enrollment for Arts and Science	
	Non-Woven Materials and Engineering	4 years	5900	Physics, Chemistry (Both subjects must be selected by candidates for application)	Science	
	Clothing and Costume Design	4 years	8000	No specific subject requirement	Co-enrollment for Arts and Science	
	Performance	4 years	8000			
School of Materials and Chemical Engineering	Chemical Engineering and Technology	4 years	5900	Physics, Chemistry (Both subjects must be selected by candidates for application)	Science	
	Practical Chemistry	4 years	5900			
	Light Chemical Engineering	4 years	5900			
	Bioengineering	4 years	5900			
	Polymer Material and Engineering	4 years	5900			

11.3 General Admissions Regulation University

	Materials Chemistry	4 years	5900			
School of Information Science and Engineering	Computer Science and Technology	4 years	5900			
	Communication Engineering	4 years	5900			
	Network Engineering	4 years	5900			
	Software Engineering	4 years	5900			
	AI	4 years	5900			
School of Computer Science and Electronics	Microelectronics Science and Engineering	4 years	5900			
	Data Science and Large Data Technology	4 years	5900			
	Statistics	4 years	5000			
School of Smart Construction and Energy Engineering	Building Environment and Energy Application Engineering	4 years	5900			
	Intelligent Construction	4 years	5900			
	Engineering Supervision	4 years	5900	Physics (1 subject must be selected by candidates)		
	Architecture	4 years	5900	No specific subject requirement	Co-enrollment for Arts and Science	

School of Intelligent Science and Engineering	Robot Engineering	4 years	5900	Physics, Chemistry (Both subjects must be selected by candidates for application)	Science	
	Intelligent Manufacturing Engineering	4 years	5900			
School of Medical Engineering and Technology	Electronic Information Engineering (Intelligent Imaging Innovation Class)	4 years	5900			
	Mechanical Design and Manufacturing and Automation (Innovation Class for Medical Equipment)	4 years	5900			
	Artificial Intelligence (Intelligent Medical Innovation Class)	4 years	5900			
	Data Science and Big Data Technology (Medical Big Data Innovation Class)	4 years	5900			
	Bioengineering	4 years	5900			
School of Business	Human Resource Management	4 years	5000	No specific subject requirement	Co-enrollment for Arts and Science	
	Logistics	4 years	5000			

11.3 General Admissions Regulation University

	Management					
	Accountancy	4 years	5000			
	E-Commerce	4 years	5000			
	International Economics and Trade	4 years	5000			
	Big Data Management and Application	4 years	5000	Physics (1 subject must be selected by candidates)	Science	
	Digital Economy	4 years	5000			
	Financial Project	4 years	5000			
School of Foreign Languages	English	4 years	4500	No specific subject requirement	Co-enrollment for Arts and Science	Foreign Language Requirement: English
	Business English	4 years	4500			
School of Design and Arts	Visual Communication Design	4 years	8000			
	Environment Design	4 years	8000			
	Product Design	4 years	8000			
	Digital Media Art	4 years	8000			
	Advertising	4 years	6000			
School of International Education	Electrical Engineering and Automation	4 years	22000	Physics, Chemistry (Both subjects must be selected by	Science	Joint education program with foreign institutions.

11.3 General Admissions Regulation University

	Mechanical Design, Manufacture and Automation	4 years	22000	candidates for application)		
	Software Engineering	4 years	25400			
School of Excellence in Engineering	Electrical Engineering and Automation (Smart Grid Innovation Class)	4 years	5900			
	Computer Science and Technology (Meta-Universe Innovation Class)	4 years	5900			
	Mechanical and Electronic Engineering (Intelligent Network Innovation Class)	4 years	5900			
	Microelectronics Science and Engineering (IC Innovation Class)	4 years	5900			
	Automation (Low Altitude Technology Innovation Class)	4 years	5900			
Hunan Electric Vocational	New Energy Science and Engineering	4 years	5900	Physics, Chemistry (Both subjects must be	/	Chu Yi Craftsman

and Technical Institute	(Chu Yi Craftsman Program)			selected by candidates for application)		Program (Hunan only)
Hunan Urban Construction Vocational and Technical Institute	Intelligent Construction (Chu Yi Craftsman Program)	4 years	5900			
Note: If There Is Any Change in the Above Tuition Standard, The Latest Standard Stipulated by the Superior Authority Shall Prevail						

Chapter V Admission Rules

Article 13 The University shall determine the filing ratio according to the source of students in each province (autonomous region or municipality directly under the Central Government). According to the batch of parallel voluntary filing, the filing ratio shall be controlled within 105% of the announced plan in principle; According to the batch of voluntary file placement, the file adjustment ratio is controlled within 120% of the public plan in principle, to ensure that the file adjustment candidates who meet the admission rules can be admitted.

Article 14 The University shall recognize the national and provincial (autonomous region and municipality directly under the Central Government) policy increase granted to candidates by the admission authorities of each province (autonomous region and municipality directly under the Central Government) registered by the Ministry of Education. Sub-item and score value. If the same candidate meets a number of conditions to increase the score, only the maximum range of the score value, and not more than 20 points.

Article 15 The University shall be admitted to the Chinese-foreign cooperative educational programs in accordance with the policies of the state and the provincial admission office on Chinese-foreign cooperative educational programs. In principle, candidates are required to take the foreign language test in English. The school English major and Business

English major are required to take the unified foreign language examination in English. Other majors are not restricted to take the unified foreign language examination in English. However, the university's public foreign language courses are taught in English.

Article 16 The University does not set up a score difference for the voluntary majors , but selects the best students according to the principle of “score first and follow the aspiration” .In the case of the same scores, the university will be admitted according to the ranking rules of the same scores of the source province (autonomous region, municipality directly under the Central Government); If the source province (autonomous region and municipality directly under the central Government) does not have clear sorting rules for the same points, the admission will be sorted from high to low according to the single subject scores of Chinese, mathematics and foreign language. If the candidates fill in the professional volunteer failed to be admitted and agree to the professional transfer of candidates, transfer admission to the professional group or the corresponding category of other eligible and did not complete the plan of the major. Candidates who cannot meet all the professional volunteers and do not agree to the transfer will be withdrawn from the file.

According to the batch of parallel volunteer filing, applicants who do not complete the plan will collect volunteers. According to the batch of applicants who wish to file in the order, in the case of insufficient student resources of the first volunteer candidates, the school can accept non-first volunteer candidates, and they will be admitted according to the excellent admission points. If the qualified non-first volunteer candidates are still insufficient, volunteers will be collected.

Inner Mongolia Autonomous Region candidates in the general class of professional admission to implement the “enrollment plan 1:1 within the scope of professional volunteer queuing admission” admission rules.

In the comprehensive reform province (autonomous region, municipality directly under the central Government), candidates should meet the requirements of the selection of subjects in the professional enrollment of our university. The methods for the comprehensive quality evaluation of candidates shall be implemented in accordance with the

relevant provisions of the Ministry of Education.

Article 17 Admission rules for art majors: The school's art majors include fashion and clothing design, performance, visual communication design, environmental design, product design, and digital media art. The scores of art majors shall be based on the corresponding art unified examination scores of the source province (autonomous region or municipality directly under the Central Government), and the scores of culture and majors shall meet the corresponding batch admission control scores stipulated by the admission office of the province (autonomous region or municipality directly under the Central Government) where the students are located. The admission procedures shall be governed by the relevant provisions of the provincial admission office where the students are located. The candidates entering the file school according to the candidates' filing scores from high to low arrangement of majors, filing scores under the same condition, according to the source province (autonomous region, municipality directly under the Central Government) filing of the same points sorting rules for sorting admission, if the source province (autonomous region, municipality directly under the Central Government) does not clear the same points sorting rules, then according to the professional, Chinese, mathematics, foreign language scores high priority admission.

The performance major is limited to recruit candidates in the direction of clothing performance. In principle, the height of boys is above 1.8m, the height of girls is above 1.68m, and the body proportion is well-proportioned.

Inner Mongolia Autonomous Region art major admission results shall be based on the Inner Mongolia Autonomous Region art unified examination results, admission procedures shall be subject to the relevant provisions of the admission department of Inner Mongolia Autonomous Region.

Chapter VI Supplementary Rules

Article 18 The University's macro-control plan for changing majors. In principle, the number of transferred and transferred students shall be

controlled within 20% of the total number of students in the corresponding grade. For the transfer students. For majors with low employment rate or insufficient teaching resources, the number of majors transferred should also be controlled. If the number of students applying for transfer or transfer to a major exceeds 20% of the total number of students in the grade of the major, the selection will be carried out according to the principle of “equal opportunities, grades first”.

Article 19 School tuition and accommodation fees shall be determined in strict accordance with the relevant documents of Hunan Provincial Department of Finance, Price Bureau and Department of Education, and shall be announced by the provincial enrollment authorities.

Article 20 The University has set up a multi-channel financial aid system, including awards, loans, assistance and attendance. Students whose families have financial difficulties may apply for local student loans. At the same time, according to the relevant policies, regulations and procedures, the university will take such measures as work-study and special poverty subsidies to provide financial assistance. The University advocates the all-round development of students’ morality, intelligence, physical fitness, beauty and labor, and encourages students to complete their studies by obtaining various awards and grants at various levels.

Article 21 The physical examination standards for enrolled candidates shall be implemented in accordance with the Guiding Opinions on Physical Examination for Enrollment of Ordinary Institutions of Higher Learning promulgated by the Ministry of Education, the former Ministry of Health and the China Disabled Persons’ Federation and other supplementary provisions.

Article 22 The ideological, political and moral character assessment and physical health status inspection of the admitted candidates shall be based on the information collected by the candidates when they register for the admission examination of ordinary colleges and universities or the counterpart admission examination, and the students shall be responsible for the authenticity of the information provided.

Article 23 Within three months after the admission of new students, the university shall, in accordance with the provisions of the admission

policy, review and the registration qualifications, physical and mental conditions, admission procedures and procedures, admission qualifications, preferential qualifications and relevant supporting materials of new students. The university will focus on studying and dealing with the problems found in the review. Any fraudulent applicants will be disqualified from admission once they are verified. Those who commit serious fraud or are suspected of impostor will be transferred to relevant departments for investigation and handling.

Article 24 This regulation will be released to the public through the “Sunshine College Entrance Examination” platform and the official website of the college. If there is any misunderstanding of the content of the regulation published by various media, the complete admission regulation published by the university shall prevail.

Article 25 This charter is applicable to the 2024 college enrollment of our university. The right of interpretation belongs to the Enrollment, Employment, Innovation and Entrepreneurship Guidance Office of Hunan Institute of Engineering. In case of adjustment of the recruitment policy of the superior, the latest policy promulgated shall prevail.
